

Flash talk presentations

Session 1: Thursday – 12:15-12:35

Adam, Dieter P-1

Antitumoral efficacy of TRAIL-induced necroptosis in vitro and in vivo

de Vasconcelos, Nathalia P-11

High-Resolution Time-Lapse Analysis of Organelle Dynamics During Pyroptosis

Denisenko, Tatiana P-12

Involvement of autophagy in the outcome of mitotic catastrophe

Feoktistova, Maria P-20

A20 enhances TNF-induced cell death signalling by regulating complex I and complex IIb (Ripoptosome) formation

Garg, Abhishek P-23

Immunogenic apoptosis integrates 'mimicry' of pathogen defense response with danger signaling to facilitate neutrophil-based phagocytic or cytotoxic targeting of cancer cells

Jost, Philipp P-36 (presenting author: Enkhtsetseg Munkhbaatar)

Characterization of the role of BCL-2 family members in lung carcinoma development

Sladky, Valentina P-62

The PIDDosome regulates polyploidization during liver development and regeneration

Vallée, Déborah P-74

Inhibition of the IRE1 α branch enhances the anti-tumoral activity of Sorafenib in hepatocellular carcinoma

Wiernicki, Bartosz P-78

Ferroptosis - a new iron-dependent necrotic cell death - is not immunogenic

Flash talk presentations

Session 2: Friday– 12:45-13:05

Aira, Lazaro Emilio P-3

Caspase 1/11 deficiency in mice leads to a decrease in the induced psoriasis-like phenotype

Bezu, Lucillia P-5

P-eIF2 α : From Endoplasmic Reticulum Stress to Clinical Biomarker of Immunogenic Cell Death

de Looff, Margot P-9

The role of Src in TRAIL signalling in non-small cell lung cancer cells

Devi, Gayathri P-13

Suppression of immune response by tumor cell-induced XIAP-NF κ B signaling and targeting strategies to overcome immunotherapy resistance in inflammatory breast cancer

Li, Mark (Xiang) P-45

Bak α 6 permits activation by Bh3-only proteins and homo-oligomerization via the canonical hydrophobic groove

Riss, Terry P-57

Real-Time Homogeneous Assay for Apoptosis using Complementation of Annexin V Luciferase Fragments

Solà, Carles P-63

Hantavirus infection promotes TRAIL-expression while protecting infected cells from DR5-mediated apoptosis

Stojkov, Darko P-65

Regulation of cytoskeletal dynamics by post-translational glutathionylation: Implications for NET formation.

Tuyaerts, Sandra P-73

PRIMMO study: combining PD-1 blockade, radiation and immunomodulation to tackle cervical and uterine cancer
